

Job matching for your mid-level workforce

The industry's first assessment designed for mid-level talent

What if you could effectively match mid-level job candidates and existing employees with the right positions? You would improve selection, onboarding, and employee management, not to mention increase retention and workforce performance.

JobFit Select is the industry's only job matching assessment built specifically for your mid-level workforce. It enables you to accurately assess behavioural traits and reasoning skills to connect the right people with the right jobs.

JobFit Select Features

- ✓ Comprehensive assessment for mid-level workforce
- ✓ Takes less than 30 minutes to administer
- ✓ Cloud-based, mobile, and texting technology
- ✓ Cost effective
- ✓ Self-interpretive reporting
- ✓ Industry job pattern database
- ✓ Includes distortion score that measures candour
- ✓ Immediate results that deliver 5 valuable reports
- ✓ Based on valid research and reliable scientific data

Use JobFit Select throughout the employee lifecycle for your mid-level talent. It's a cost-effective tool that's quick to administer and rich with valuable information:

- » **Pre-screen with confidence:** Now you can avoid the cost and risk of yesterday's "hire and hope" approach. Using standardised job profiles, JobFit Select provides a reliable guide for hiring and job placement.
- » **Reduce turnover while increasing revenue:** Matching the right people with the right jobs improves morale in your workplace. As a result, you retain more employees and benefit from higher productivity.
- » **Provide empowerment and motivation:** Use JobFit Select to empower and motivate at the employee level, while improving effectiveness and opportunity for growth at the organisational level.

Your mid-level job matching tool is finally here.
